Profile

Hi, I'm Tam Jian Xin, a Computer Science (Hons) graduate from Multimedia University (MMU) Cyberjaya, specialising in Data Science. I'm passionate about building data-driven solutions and using technology to solve real-world problems. Fluent in Mandarin, English, and Malay, I enjoy learning new technologies, tackling complex challenges, and turning ideas into practical outcomes.

Experience

AUG 2025 – PRESENT | BUSINESS DATA ANALYST

Biosensors Interventional Technologies Pte Ltd | *Full-time* | *Singapore*

- Designed and implemented business application solutions aligned with organizational and business process requirements
- Managed full Software Development Life Cycle (SDLC), including development, testing, deployment, and support
- Developed and maintained SQL queries and stored procedures for system functionality and data processing
- Collaborated with cross-functional teams, business users, and ERP/non-ERP stakeholders on project requirements
- Provided post-implementation support and troubleshooting to ensure smooth system operations
- Evaluated and enhanced system performance, reliability, usability, and overall functionality through continuous improvements
